This validator validates a Systems Biology Markup Language ([SBML](#)) document against an SBML schema. Currently this validator supports level 1, versions 1 and 2 and level 2 version1. More information is available from the [SBML Level 2 area](#). If your model is successfully validated, you will then have the option to submit it to our repository or to visualise it in your browser.

MAPKcasc-2000Kho.xml has been validated. Validation results are displayed as follows:
If errors are found, a list of them is printed out displaying the line number where the error occurred.
If no errors are found, a "Model validates OK" message is displayed, possibly accompanied by a list of warnings.

filename: /var/www/html/jo/htdocs/sbmlmodels/MAPKcasc-2000Kho.xml
file size: 7715
read time (ms): 39
error(s): 0
Model Validates OK

model name: ATitle
unitDefinitions: 0
compartments: 1
species: 8
parameters: 0
reactions: 10
rules: 0
